

# ROLE MODELS ACTIVITY: PROGRAM A GOOD ROLE MODEL

A **role model** is someone you look up to and model yourself after. For example, when you are thinking about what to do or how to behave, you might think about your role model and ask, "What would my role model do in this situation?"

In this activity, you will program a ModelBot to be a good role model by choosing what qualities are good, bad, or not important for a role model to have.

**Directions:** Read the statement under each gear. Decide if that statement is good, bad, or not important for your ModelBot to be a good role model. Draw the needle on the gear to point to good, bad, or not important.

"I got the best grades in my class, and I love to brag about it!"

"I can disagree with someone and still be their friend."

"I have the coolest armor of all the ModelBots."

"I use my strengths to help others."

"When someone tells me I hurt their feelings, I tell them they need to get over it."

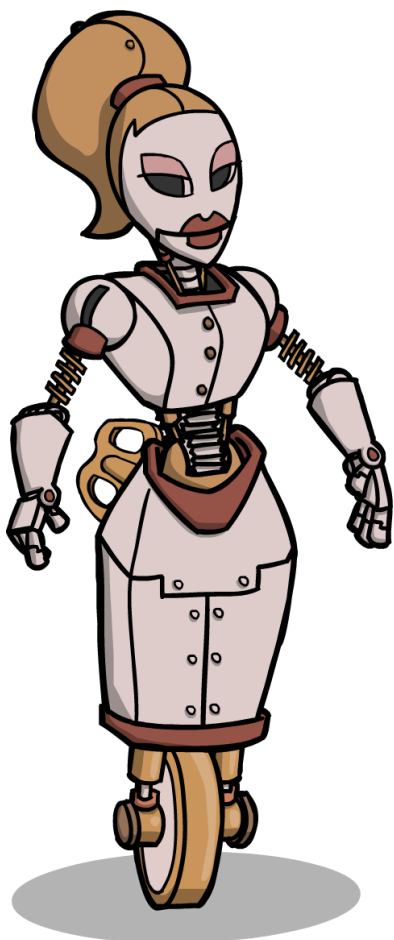

# ROLE MODELS ACTIVITY: PROGRAM A GOOD ROLE MODEL

A **role model** is someone you look up to and model yourself after. For example, when you are thinking about what to do or how to behave, you might think about your role model and ask, "What would my role model do in this situation?"

In this activity, you will program a ModelBot to be a good role model by choosing what qualities are good, bad, or not important for a role model to have.

**Directions:** Read the statement under each gear. Decide if that statement is good, bad, or not important for your ModelBot to be a good role model. Draw the needle on the gear to point to good, bad, or not important.

"When something upsets me, I keep my cool."

"I have the best hairstyle of all my ModelBot friends."

"When I notice someone is alone, I leave them alone. It's not my problem."

"If someone is saying something I'm not interested in, I interrupt them."

"When I want to reach a goal, I make an action plan and follow the steps."

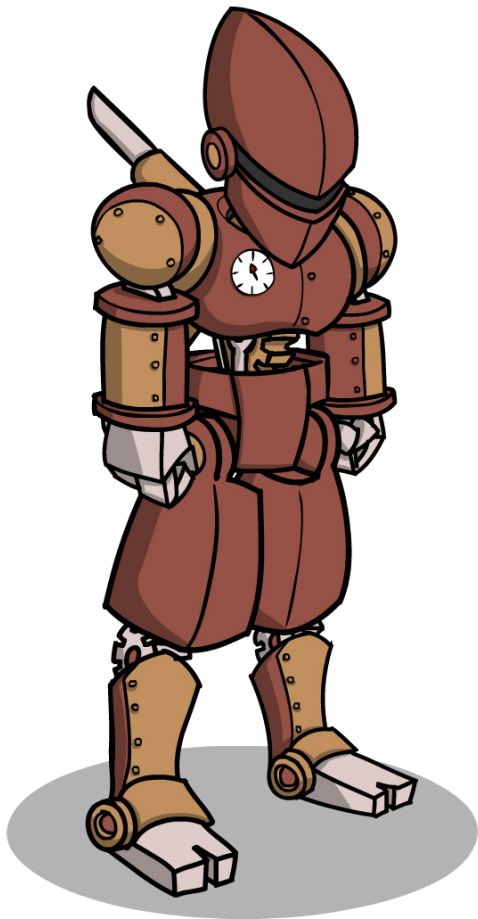

# ROLE MODELS ACTIVITY: PROGRAM A GOOD ROLE MODEL

A **role model** is someone you look up to and model yourself after. For example, when you are thinking about what to do or how to behave, you might think about your role model and ask, "What would my role model do in this situation?"

In this activity, you will program a ModelBot to be a good role model by choosing what qualities are good, bad, or not important for a role model to have.

"I'm the best swordfighter around."

"If I want to achieve a goal, I work really hard and stay focused."

"My job pays a lot of money."

"When I'm not good at something, it just means I need more practice."

"I'm really famous, so everyone wants to be around me."
