STOP AND THINK
ACTIONS MATCH REACTIONS

Our actions toward the other person, including our behavior, what we say and when and how we say it, and our facial expressions and body language, influences the kind of reaction we get from the other person. If we are angry, hurtful, or yelling, it is likely that the other person will be angry, hurtful, and yell back at us. So before we talk with another person, especially if we are upset, it’s important to stop and think about how we will come across to that person.

Directions for Students: In this activity, you are going to look at a group of actions and reactions. You should carefully cut out each of the action and reaction panels on Page 4 of the worksheet. Match each action with the reaction that goes with it, then paste them next to each other on one of the scrolls.

Educator Answer Key

A = J
D = G
F = C
H = E
I = B
Cut out the panels on Page 4. Match each action to its reaction, then glue the pair next to each other on one of the scrolls.
Cut out the panels on Page 4. Match each action to its reaction, then glue the pair next to each other on one of the scrolls.
