

SUPERHERO TOOLKIT: EMOTION IDENTIFIER

Directions: The Emotion Identifier below helps the heroes at Hall of Heroes figure out how others are feeling. The emotions on the left are negative, and they range to positive on the right. The boldest colors on the outside of the identifier represent intense emotions, and both the colors and emotions get mild towards the inner circle.

Some heroes at Hall of Heroes have the ability to see auras of these colors around their classmates that indicate how their classmates are feeling, but we have to use other clues like body language and facial expressions. Determine how each character on the next page is feeling, then find the color that represents that emotion on the Emotion Identifier. Use a marker or colored pencil that matches to draw that color aura around the character.
